

# Series 116 – 150 MPa

- High working pressure
- Compact design
- Unique sealing design
- Non-drip on connection and disconnection
- Dust caps included as standard
- Nipple without valve available
- Coupling with extra safety ring available

A CEJN original, Series 116 is offered in both standard and Flat-Face designs for use on cylinders, bolt tensioner tools, bearing pullers and more. It features extremely small outside dimensions, and non-drip connection and disconnection are standard. All exposed components are made of zinc-plated steel. The series includes a safety ring design featuring a locking sleeve that prevents accidental disconnection. The couplings and nipples are available in stainless steel and chemically nickel-plated steel for use in corrosive environments. The series also includes a coupling with a 90° angled swivel connection for use in confined areas. Extending the service life of the entire hydraulic system, plastic dust caps are standard on both the couplings and nipples. Aluminum dust caps can be ordered separately.

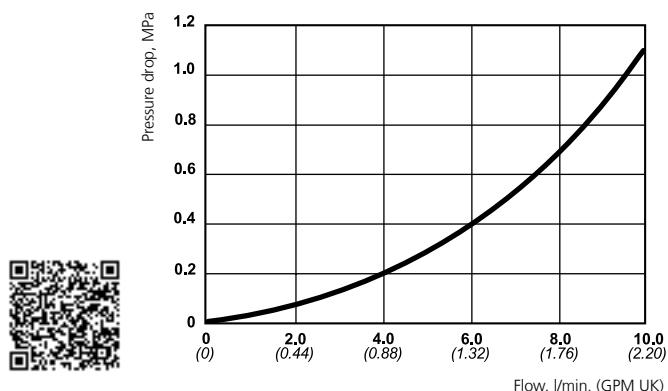

## TECHNICAL DATA

## OIL FLOW

<b>Nominal flow diameter</b>	2.5 mm (3/32")
<b>Flow capacity</b>	6.0 l/min (1.3 GPM UK)
<b>Max. working pressure</b>	150.0 MPa
<b>Min. burst pressure</b>	300.0 MPa
<b>Temperature range</b>	-30°C – +100°C (-22°F – +212°F)
<b>Material coupling</b>	Hardened, zinc chromate plated steel
<b>Material nipple</b>	Hardened, zinc chromate plated steel
<b>Material seal</b>	Nitrile (NBR) other sealing materials on request

Flow capacity is measured at 0.4 MPa pressure drop.

# Series 116 – Flat-Face 150 MPa

- Flat-face design
- Non-drip on connection and disconnection
- Dust caps included as standard
- One-hand operated
- Automatic safety locking device
- Connects with nipple series 116 standard

CEJN Series 116 in a Flat-Face design has a working pressure of 150 MPa. Series 116 Flat-Face is primarily recommended for industrial applications, such as bolt tensioners, splitters and clamping tools.

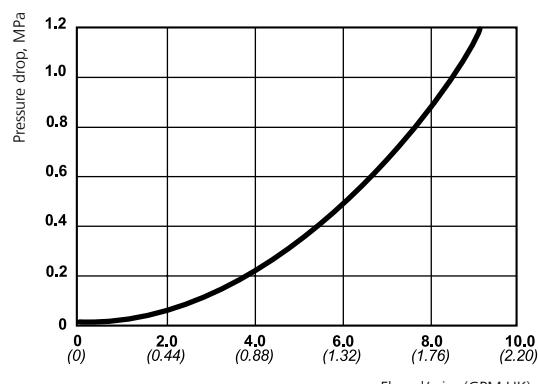

## TECHNICAL DATA

## OIL FLOW

<b>Nominal flow diameter</b>	2.5 mm (3/32")
<b>Flow capacity</b>	5.3 l/min (1.2 GPM UK)
<b>Max. working pressure</b>	150.0 MPa
<b>Min. burst pressure</b>	300.0 MPa
<b>Temperature range</b>	-30°C – +100°C (-22°F – +212°F)

# Series 116 – T-Connection 150 MPa

- One-piece design
- Lightweight, compact
- Cost-effective

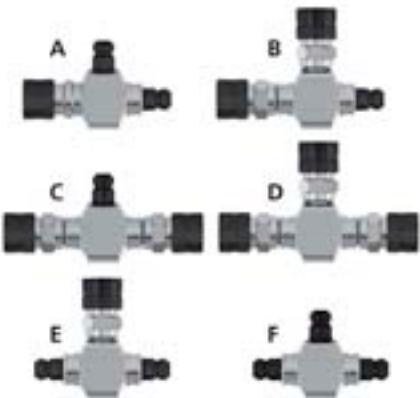

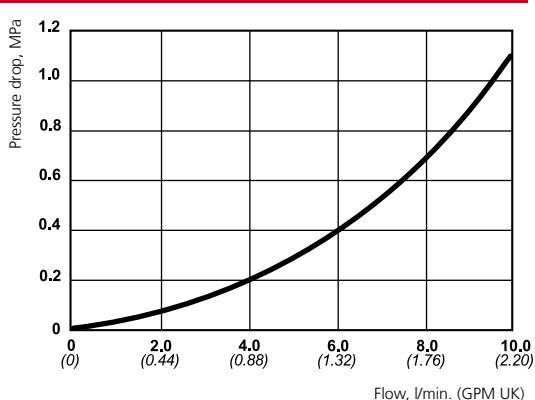

CEJN's Series 116 T-Connection is a lightweight, one-piece coupling and nipple combination for making serial connections on high-pressure hydraulic tools, such as bolt tensioners and cylinders. Replacing traditional porting blocks that can require up to 13 components with at least five different part numbers, the compact T-connection minimizes risk for leakage by reducing potential leak points. A modified seal enables the nipple valve to handle dynamic load while disconnected, without the risk of seal damage. The tested, pre-assembled connection comes ready for installation, thereby saving assembly time and costs.

## TECHNICAL DATA
