

DATASHEET DS-5

SERIES: HTS Standard Tensioners

1500 bar pressure 15mm stroke

SAFE AND RELIABLE

- CE marked
- Over-stroke protection
- Max stroke indicator
- Pressure Test Certification
- Full colour operating and safety manual
- Long life performance

LATEST TECHNOLOGY

- Latest seal technology
- High cycle life
- Optimised load to weight ratio
- Integrated system with TensionPro pumps and hoses

IN STOCK FOR QUICK DELIVERY

TENSIONPRO is a trading name of Secure Bolting Systems Ltd. Unit 15 Morgans Business Park, Norton Canes, Staffordshire, WS11 9UU, UK Document Revision Feb-20 HTS series standard range tensioners are versatile and reliable hydraulic tensioners suitable for all bolting applications.
Optimised for top-side applications they are perfect for tightening ANSI, ASME and API flanges.

PROCESS IMPROVEMENT

HTS Hydraulic Tensioners are quick and simple to use. Installed by hand in minutes, multiple tools are harnessed together to give IMPROVED SPEED for the bolt tightening process. The even joint compression ensures uniform bolt loading and gasket compression that gives superior bolted joint performance.

OPTIONS AND FEATURES

- Special threads
- Special load requirements
- Twin or single port
- Special bridge for tight clearance
- Oil pressure calculations
- Long stroke designs
- Interchangeable parts
- High temperature options

PAL PURE AXIAL LOADING

The TensionPro Tensioner method allows bolts to loaded with an accurate force that is directly proportional to the pressure applied to the tool. **NO FRICTION** bolt tightening for an accurate and repeatable bolt tightening method.

The tensioner load or force is easily calculated:

 $F = (P \times A)/10,000$

Tensioner Force F [kN]
Tool Pressure Area A [mm²]
Pressure P [kN]
